

SonoSim Services Bundle

Access Exclusive Membership Tools & Support

The SonoSim Services Bundle is a comprehensive program that provides 24/7 remote access to SonoSim Courses, user analytics, curriculum integration tools, hardware protection, content upgrades, and Member Support services.

Services Bundle Benefits

Provide anywhere-anytime remote learning for your users with **24/7, at-home access to SonoSim Courses**.

Access the SonoSim Mobile App, your ultrasound assistant! Reference ultrasound techniques at the patient bedside and review ultrasound concepts on-the-go.

Monitor and review scans with SonoSim Performance Tracker, while learners build portfolios of ultrasound knowledge. **Assign Sample Assignments** to turn learning concepts into assessable scanning tasks.

Apply the new Curriculum Mapper to match SonoSim Modules with your specific program and ultrasound rotations. Use pre-made **Curriculum Checklists** to map to industry recommendations.

Teach how to apply ultrasound towards medical decision making with **an annual SonoSim LiveScan® workshop!** Our staff will help you run a live group workshop and be on-hand for questions.

Protect your Probe and SonoSim-certified laptop with a limited hardware warranty.*

Receive content upgrades to access the newest ultrasound images, inclusive of improvements to current cases and the addition of new cases in the SonoSimulator®.

Available in Years 2-5	Without Services Bundle	Recommended
